Education

University of Portland – Computer Science 2015

Technical Skills

Languages: Java, Javascript, CSS, Sass, HTML

Experience

PRODUCT HUNT HACKATHON

Organized this event in Portland, where my team and I made wkfr.co/splash/rewards - a platform that rewards individuals when they work from coffee shops, bars, and cafes.

DUBHACKS

Developed sparkchat.us - a wireless mesh network using Bluetooth, with a focus on anonymity and private messaging.

HACKPDX

Octohack - A notification system for failed 3D prints (using Octoprint, Twilio, Orchestrate and SendGrid). We won the SendGrid prize for this project. I am also currently working with two others to organize the next event, which will be held in the beginning of April.

MEET THE FOUNDER

meetthefounder.co - Started a blog that tracks down today's startup founders in order to discover what's new in the startup world.

Employment History

HEALTHSPARQ FRONT-END DEVELOPER INTERN

From May to August 2014, I was an intern for a Cambia Health Solutions company, where I further expanded my web development skills.

Leadership

UNIVERSITY INNOVATION FELLOW

A program that offers undergraduate engineering students the training and support to become leaders who catalyze change on their home campuses.

ENTREPRENEUR SCHOLAR

A competitively selected group of UP undergraduate students who create new business ventures, social enterprises, as well as implement innovative products and delivery models for these organizations.
